

## yeast infection after ectopic pregnancy

In many cases, you can safely deal with a vaginal candida albicans with an over-the-counter medication. You can also try dealing with a yeast infection at home with these tips for personal-care to relieve itching and burning, and other symptoms. Just know the three situations when you see a doctor, and you're well on your way to healthy self-care for yeast infections. If, you Might Try Self-Care for a Yeast Infection: You've been previously diagnosed with yeast infection and you now have the same symptoms, so you are sure you have a yeast infection and not something else. You haven't had sex with an all new partner, so you're not at risk of being previously exposed to any new STDs (sexually transmitted diseases). Most of the symptoms of a yeast infection -- burning and itching, and vaginal discharge -- can mimic the signs and symptoms of STDs. [...](#)
